THE GEO-MATRIX SILVERBACK DIFFERENCE

The Geo-Matrix Silverback Prime has a single strip of gel running the full length of the spine-notice the reduction of pressure along this high risk area.

In addition to the single strip of Geo-Matrix gel in the Prime, the Geo-Matrix Silverback Max has an additional full layer of Geo-Matrix gel across the entire surface.

Notice the further reduction of spinal pressure and the overall reduction through the scapulae.

SEE & FEEL

Flexibility, Agility & Responsiveness

Blake Medical is a family-run business, and we strive to treat each client like a part of our family. If for any reason you are not happy with one of our products, please let us know and we will rectify the issue.

Our innovative engineers and committed customer service personnel are focused on ensuring a consistently positive customer experience that exceeds expectations.

HARDWARE QUICK RELEASE

The Quick Release mounting hardware is designed to be strong and functional. This Quick Release mounting hardware allows for infinite on chair adjustment like angle, height and depth. With a locking catch you can be assured the **Silverback will never release unless you want it to.**

THE NEXT EVOLUTION IN COMFORT | WHEELCHAIR BACKRESTS

RESTEASY

Geo-Matrix Silverback Tension

The Geo-Matrix Silverback Tension back gives you a completely custom contour. With multiple adjustable Velcro straps and quick, secure installation, this option provides an easy, flexible solution with the unique ability to accommodate other custom pieces for additional support and further customization.

The Silverback tension contains a full layer of Geo-Matrix gel for pressure reduction and high-density foam for increased support and comfort. For added protection, the Tension also offers padding for back cane posts, and additional Geo-Matrix gel sheets are available to further increase comfort and skin protection

CHOOSE YOUR ALUMINUM SHELL

From Depth to height and almost every variable inbetween, we have the best back to support your needs.

Active Contour
2.5" Depth (63.5mm)

Deep Contour
4" Depth (100mm)

Extra Deep Contour
6" Depth (150mm)

Standard 16"

Tall 18"

Extra Tall 20"

Geo-Matrix Silverback Wheelchair Backs

Lightweight * Spinal Support * Maximum Comfort

Geo-Matrix Silverback wheelchair backs incorporate a vertical insert of Geo-Matrix gel to target protection to the high-risk area around the spinal column.

The spinal inserts ensure optimal comfort and skin protection from the shear that results when wheelchairs tilt and recline, reducing the risk of pressure sores from developing along the spine. Geo-Matrix gel is a mineral-oil- based, dry-polymer solid gel that stays in place regardless of pressure and is unaffected by the pull of gravity.

So, whether in an upright position or in full tilt, the unique properties of the gel allow it to move with the body, reducing shear and reactionary force.

Variations Available

The Silverback wheelchair backs are rated for up to 250 lbs. at all degrees, for years of enjoyment and use or abuse!

Where extra skin protection is necessary, the Silverback Max's extra layer of gel provides superior vibration dampening qualities, making it an exceptionally comfortable and protective back for power wheelchairs.

It also delivers extra protection when the spine is subjected to added pressure from prolonged wheelchair tilt conditions.

The Silverback Max is best for most clients and is especially beneficial to address over-curvature of the spine (kyphosis).

However, if weight is a concern, the lighter Silverback Prime is also available.
