FOOTNOTES:
1. 7 mph can only be achieved with optional 4-pole motors .
2. Seat-to-floor heights are measured with the unit unloaded. Due to the 4Front's suspension system, seat-to-floor heights are approximately 0.25" lower when the unit is loaded. Tire type and inflation can also impact the seat-to-floor heights.
3. Reduced to 400 lbs. with iLevel® power adjustable seat height
4. Speed varies with user weight, terrain type, battery charge, battery condition and tire pressure.
5. Without front riggings
6. Battery capacity may change when adding power positioning systems.
7. Weight capacity is dictated by the selection of seating.
8. All measurements +/- 1/8" with 18" x 18" seat, fixed towers, 300 lbs. weight capacity and solid tires (add 3/8" with pneumatic tires). Depths may increase seat-to-floor height. Contact Customer Service for details. Listed measurements are in the lowest position; does not include elevating system unless specified.
9. A minimum seating size of 20" x 20" is required with iLevel® on the Q6 Edge® HD; maximum seating size is 24" x 24"
10. All Quantum units can be ordered with specialty controls
11. Battery weight may vary based on manufacturer.

The information contained herein is correct at the time of publication; we reserve the right to alter specifications without prior notice.
