

Hugo Comfort Max Lightweight Aluminum Crutches

HCPCS:

FIGURE A

FIGURE B

FIGURE C

FIGURE D

FIGURE E

- Ergonomic crutches with easy push-button adjustment
- Crutches are comfortable, lightweight (lighter than wood) and made from anodized aluminum
- Feature contoured accessories that provide ergonomic comfort, and are smooth for easy cleaning
- Include a curved stair deflector at their tip, washable grips and thick underarm padding so you can go farther without feeling fatigued
- Approximate patient height settings are labeled on the center tube to within 1" increments
- Crutch tips provide exceptional traction while a built in metal ring protects against premature wear
