LECKEY

Say hello to the Leckey family of products.

I am delighted to introduce our new Leckey product guide and celebrate our Leckey family circle.

At Leckey we believe in **'Supporting Children'**.

To everyone in Leckey, Supporting Children means working together with our family of experts – designers, therapists, parents and the broader clinical community to achieve our goals.

Our **Mission** is; To improve the quality of life of children with special needs.

Our **Vision** is; A world where each child is included and they can access their full potential.

Our **Courageous Goal** is; To prevent hip migration in children with CP.

In Leckey we see hip migration as the single biggest life event that our children may experience and has the greatest impact on their quality of life and their carers from that moment on.

Everything we do in Leckey, in partnership with our family of experts, is aimed at achieving these goals.

Our approach is simple – lead through innovation and clinical focus.

Through early intervention, childhood right up to adulthood, Leckey's experienced team of designers and clinicians work together with our family of experts to develop exciting innovative products that make a real difference to the quality of life for the children and their families.

We aim to develop clinically and technically superior solutions, products and programs, that improve the child's Mobility, Ability and Participation.

All of our designs undergo extensive clinical and usability trials with physiotherapists, occupational therapists, users and their families.

They are supported by in-depth clinical research studies where we work with leading universities and clinicians internationally to ensure that all Leckey products deliver on the clinical needs of the healthcare professionals and the social needs of the user.

We are committed to our Mission, Vision and Courageous Goals. We want to work with you in partnership to build our family - a community of experts with shared goals and values.

Join our family and together we will make a difference.

LECKEY

Seating

LECKEY Early Activity System

Colourful, comfortable, supportive activity system for children aged 0-36 months.

Product Features

- Offers a gentle, playful introduction to 24-hour postural management.
- Practical all-in-one kit, providing versatile support. The positioning possibilities are endless and everything can be packaged up in the duffle bag for easy transport.
- Supplied with the popular Activity Development Programme which supports parent-led therapy at home.
- Soft-touch, anti-bacterial, machine washable and tumble dry safe covers.

Key Positions

- Back Lying (Supine)
- Tummy Lying (Prone)
- Side Lying
- Floor Sitting (Long sitting)
- Hands and knees (Four point kneeling)

LECKEY Pal

Colourful, comfortable classroom seating system providing mild support for children aged 1-12 years.

Product Features

- Two-point lap belt and side pads for lateral stability. An optional ramped cushion can be added if extra help is needed to keep the pelvis and femurs in alignment.
- Where a less upright angle is required, the backrest angle and armrests adjust to suit the child's needs, and along with the large tray or table, provide appropriate support.
- Height adjustable armrests, legs and footplate.
- Available in two bright colours in wipe clean fabric (please see website for details).
- A range of base and footrest options available, including castors, rockers and stabilisers.
- Two-person and four-person matching tables available.

Available in 2 fabric colours

LECKEY Squiggles Seat

Suitable for use as a home chair, school chair or with a mobility base, Squiggles Seat meets all the postural and comfort requirements of a seating system for young children with special needs, while maintaining a fun, colourful design.

Product Features

- Designed specifically for the developmental needs of younger children- the one-piece seat base and adjustable sacral support can be used to accommodate flexion or encourage extension.
- The shape of the seat and back, the laterals with their fabric tip which wrap securely around the child and the way in which the 4-point pelvic harness integrates with the hip pads, provides a snug, comfortable fit and streamlined look.
- Being low to the ground, the Squiggles Seat promotes
  peer to peer interaction, making it ideal for home and nursery/school environments.
- Adjustable footplate can be tilted to the preferred angle, ensuring the feet are well supported and providing a secure base for maximum upper body function. The footplate flips away to allow for easy transfers.
- Tilt-in-space feature provides a simple way to achieve a change of position without disturbing overall posture.

LECKEY BeMe

Support as Individual as You Are

Every child has unique needs, and no single solution can meet them all. That's why BeMe is a family of supportive seats for children with mild to advanced postural needs, designed to grow and adapt with every child, and for every stage of life.

- Three seats
- Four sizes
- A range of indoor, power and manual bases
- A host of interchangeable accessories
- Available in 4 vibrant colours with an easy to clean option

Family Of Seating Systems

Our BeMe family of seats offers THREE distinct products that will support children with a wide range of postural needs, from mild to complex.

BEME BASIC (ACTIVE)
is designed for active children who have mild to moderate support needs and use an activity seat as part of their day to help with eating, learning or play. Specifically designed to see more of the child and less of the seat, children who use BeMe Basic often transfer without additional equipment.

BEME MODERATE
is designed for children with low trunk control who required enhanced pelvic stability, trunk and head support from a seat. With an integrated contoured cushion and a back with adjustable lumbar support, precision and comfort are part of the spec.

BEME ADVANCED
is designed for children with postural asymmetry, such as a non-correctable scoliosis or ab/adduction (windsweeping) posture. Traditionally supporting these postures was only possible with a large, custom made option which required re-shaping but BeMe Advanced bridges the gap between modular and moulded seating.

Available in 4 fabric colours
Also available in 1 vinyl wipeable colour grey

LECKEY Mygo Seat

The seating system which delivers the optimum in posture, comfort and function for children aged 3-16 years with moderate to complex needs.

Product Features

- Can be fitted with the newly improved pelvic cradle. The cradle uniquely supports the pelvis by wrapping around the buttocks and posterior pelvis to encourage and maintain an upright functional position. Rigidity has been increased in the back section to enable the cradle to hold its shape, allowing enough flexibility to encourage a posteriorly tilted pelvis into neutral alignment and the overall design prevents users from sliding forward. Extra padding at the belt improves comfort, whilst colour coded buckles and webbing have been added for ease of use.
- Mygo Seat's innovatively designed split seat base enables the legs to move independently beyond the midline to accommodate windsweeping postures- a range of up to 13° abduction and 10° adduction may be achieved. Mygo Seat is also suitable for users with pelvic rotation and tilt, mild scoliosis, shortened hamstrings, femoral and lower leg length difference, and fixed plantar flexion- all this, combined with pelvic stability, ensures alignment of the head and trunk.
- Quickly and easily interfaces with a range of indoor and outdoor hi-low bases, as well as a wide range of Sunrise Medical powered and non-powered mobility bases.

Available in 8 fabric colours and a vinyl version

LECKEY Everyday Activity Seat

Strong, durable, practical and adjustable seating system, providing moderate support for kids and young adults aged 1-18 years.

Product Features

- Ideal for everyday use- the soft-touch breathable fabric, well-padded ramped seat cushion, contoured back cushion and padded arm rests combine to offer the ultimate in comfort.
- The wide range of accessories and options make it easy to adjust the seat as the user grows and their needs change.
- The flip-up footplate, hi-low base (to floor), long armrests and 10° prone tilt-in-space support self-transfers.
- 4-point pelvic harness gives a secure, stable base of support.
- Height and angle adjustable chest laterals available.
- Easy care – covers can be removed and machine washed.

Available in 3 fabric colours and 2 vinyl versions

LECKEY Leckey Therapy Bench

Developed to support children in a neutral posture, this therapy bench with innovative activity cradles facilitates child active therapy by freeing up the hands.

Product Features

- Innovative, corseted activity cradle stabilises the pelvis in a neutral position, acting as an extra pair of hands for the therapist whilst giving the child the confidence to move, reach, and grasp.
- Height adjustable trunk support helps the child to sit upright with the head and spine stacked over the pelvis. This is the best and easiest way to learn sitting posture.
- Supportive, height adjustable therapist pad acts as extra support for the therapist who can rest against the rear support and gently encourage shoulder retraction.
- Facilitates lateral and anterior/posterior tilt to promote child activity.
- Height and depth adjustable bench making it versatile for both larger and smaller users.
- Acts as an aid to therapists in the Segmental Assessment of Trunk control (SATCo), providing a greater understanding of where to apply postural support to optimise function.

JCM Star

Multi-functional supportive chair, perfect for use both at home and in the classroom, for children from 1-8 years.

Product Features

- Can be used directly on the floor for easy access to playtime activities, or with one of the base options for Tilt-in-Space functionality.
- Generous adjustment in the seat length and back height facilitating growth with the child.
- 75mm of height adjustment in each leg allows for growth and also accommodates variable table heights.
- Multi-adjustable arms enable the tray to stay horizontal even when the seat is tilted.
- Built-in pommel helps maintain correct pelvic positioning and can be adjusted in conjunction with the hip pads to align leg position.

JCM Triton

Versatile, modular seating system designed to provide comfort and support for children.

Product Features

- Numerous options and accessories enable a Triton of any size and specification to be built. The choice of Triton Lite, Triton 0 and Triton 1-3 ensures all ages, from infant to adult, and all postural support needs, from mild to complex, are covered.
- Unique Dynamix options support the user in maintaining an optimum seating position. The unique dynamic back is air pressure, not spring action, controlled, regulating the resistance the user feels as they extend and return in the chair.
- Split seat as standard ensures leg length discrepancy is precisely supported.
- Multi-directional sacral pad to accommodate rotation in the hips.

JCM Jupiter

The perfect home seating system for comfort, support and ease of use, catering for children from 3 years right through to adulthood.

Product Features

- Provides built-in pressure care as standard.
- The combination of Tilt-in-Space and back recline provides maximum comfort by reducing the risk of pressure sores, maintaining posture, increasing circulation to the limbs and easing transfers.
- Height and angle adjustable armrests help to prevent shoulder strain and increase upper body stability.
- The multi-adjustable flip away trunk support, adjustable headrest and leg rests ensure superior comfort and support.

LECKEY

Standing and Walking

LECKEY Squiggles+

A beloved classic—now better. The adaptable 4-in-1 stander for prone, supine, upright, and true abduction positioning.

Product Features

- Anatomically-correct abduction to stabilise the joint and provide optimum loading for early hip joint development. Squiggles+ offers 60° of hip abduction bilaterally in prone, upright or supine. It promotes proper alignment in the hips, knees and feet as pivot points are in line with the hips.
- Increased comfort and support with wrap-around knee supports. The comfortable medial knee supports distribute pressure and are especially suited to abducted standing. The padded wraps maintain the knee in neutral alignment.
- Providing greater confidence with transfers- the larger hip pads improve the carer's and child's confidence and feeling of security when transferring. The improved pivot chassis facilitates full horizontal loading.
- Activity tray with improved height and adjustability.
- Height-adjustable, foldable push handle.

Available in 3 fabric colours and a vinyl version

LECKEY Squiggles TT

Evolutionary early intervention standing frame that facilitates Targeted Training for children aged 1-5 years.

Product Features

- Maintaining the great features of the Squiggles+, the Squiggles TT goes a step further and facilitates Targeted Training. This evidence-based therapy is carried out with the child in an upright position, training one segment of their trunk at a time, allowing them to gain sequential control from the top down. Improved trunk control will help increase functional skills e.g. self-care and play. Better head control can help stop a child dribbling, improve their eye control as well as their ability to communicate.
- Squiggles TT is the only product specifically designed for Targeted Training therapy and which caters for all children. Horizontal loading is possible for complex children with poor head control and Squiggles TT is the only product to target all 7 trunk segments.
- Offers a fun and easy way for parents to carry out therapy at home. The snug supportive wraps are easy to use, the ratchet system with repeatable locking eliminates the fear of changing settings and the play ideas booklet provides support for home use.
- Dynamic base allows children to experience rocking movement whilst gaining upright postural control.
- Padded tray facilitates Targeted Training at the upper thoracic level.
- Conversion kit available for existing Squiggles+ users.

LECKEY Squiggles Stander

Versatile, supportive, compact stander which offers the perfect start to standing for little ones.

Product Features

- 3-in-1 prone, supine and upright stander.
- Ideal for home use due to ease of adjustments.
- Minimalist child-focused design with fun bright pads blends easily into nursery/school environments.
- Low to the ground, encouraging socialisation and interaction at eye level.
- Individually adjustable chest and pelvic supports are cushioned for comfort and adjust easily in height, width and angle to suit individual needs, ensuring a comfortable and secure position.
- Frame can be easily disassembled for storage and transportation.

Available in 3 fabric colours

Tray Angle Adjustment	30˚ - Prone 40˚ - Supine

LECKEY Mygo Stander

The stander which offers infinite positioning, helping children with moderate to complex needs stand with confidence.

Product Features

- 3-in-1 prone, supine and upright stander.
- Designed to improve upper limb function. The chest pad design replicates the shape of the rib cage which allows the shoulder girdle to freely protract and retract in prone, whilst in supine, the shoulder support promotes shoulder protraction. Furthermore, Mygo offers a lower tray height than most standers.
- Accommodates hip and knee flexion contractures of up to 25 degrees. The movement of the footplate and knee supports are linked which allows the user to stand with hips and knees flexed. This results in a more upright posture combined with the ability to support users whose contractures previously made them unsuitable for standing therapy.
- Use of the pelvic derotation belt puts the user's pelvis in a central and neutral position with minimum effort.

Available in 4 fabric colours

LECKEY Horizon

Robust, durable 3-in-1 stander
for users aged 4 years to adult.

Product Features

- Accommodation of leg length discrepancy, scoliosis, lumbar lordosis, kyphosis, knee flexion contractures and asymmetrical head position. The frame's growth potential and the wide range of accessories accommodate changing need and potential asymmetry as the user grows.
- Perfectly sized for hoisting and supine standing. The large landing space for hoisted transfers coupled with support pads which provide a proximal fit to suit each user provides the perfect combination.
- Robust, stable and durable frame ensures ongoing confident product use.
- Individually adjustable chest, hip and knee pads as well as footplates provide unsurpassed levels of adjustability.
- Height adjustable hip laterals and pelvic belt, enabling de-rotation of the hips, alignment of the pelvis and centre of gravity over the base of support.

LECKEY Pronestander

Robust, adjustable prone standing system for users aged 1-18 years.

Product Features

- Flip-up sandals support users completing a standing transfer directly into the product.
- Long base ensures maximum stability for even the most active users, providing caregivers with peace of mind.
- Unique de-rotation belt and pelvic pad work together to keep the user in a central position within the frame with equal pressure over each foot.
- Individually adjustable chest, hip, knee and sandal supports to meet a wide range of clinical needs.
- Easy to set up and adjust with five incremental secure prone positions from 85 to 45 degrees.

Size 1 only available in Meadow Fabric
Size 2 & 3 only available in Mondeo Fabric

LECKEY Freestander

Robust, upright standing system for users aged 1-18 years.

Product Features

- Flexibility to alter the frame to meet individual user needs e.g. pelvic support can be removed for users with trunk control, conversely, the tray height and angle can be increased where more support is required. A simple, active set-up is also possible for more able users e.g. hemiplegic or GMFCS II/III.
- Straightforward, intuitive adjustment as all supports run off two vertical uprights.
- Pelvic belt achieves a unique position which enables de-rotation of the hips, alignment of the pelvis and centre of gravity over the base of support as well as accommodation or correction of flexion at the hips and knees.

LECKEY Totstander

Simple and easy to use, upright standing system for kids aged 1-5 years.

Available in 1 fabric colour combination

Product Features

- Can be used as a stander or by therapists for standing assessments.
- Promotes active standing, movement and weight shift.
- Compact and easily transported to different environments e.g. from therapy centres to the home.
- Provides a gentle introduction to rehab equipment via a simple, easy-to-use, child-friendly design.

Technical Details	
	One Size Only
Age	1-5
Chest Band Height	470mm- 640mm (18.5"-25.1")
Base Depth	450mm (17.7")
Base Width	450mm (17.7")
Max. User Weight	22kg (48lbs)

Timoteos Ella

The versatile 4-in-1 stander that delivers prone, supine, upright, and abduction positioning in one comprehensive system.

Product Features

- Accommodates users from 600mm to 1800mm across 4 sizes. An optimal fit can be achieved for users through interchangeable sizes of accessories, stepless adjustments, asymmetrical adjustments and ability to fine tune set-up whilst the client is in the stander.
- Only one tool is needed for setup and adjustments- adjustments are intuitive and easy to do, supporting a user-friendly approach to postural management.
- The comfort offered by Ella is second to nonesoft padding and comfortable upholstery mean you can be confident the user is always experiencing great comfort.
- Individual abduction is available for each leg. Furthermore, the abduction brackets can be adjusted independently, meaning asymmetric posture can be accommodated.
- Available with a choice of manual or power base which can be detached for easy transportation and storage.

LECKEY MyWay+

MyWay+ is an open frame walker which cleverly supports children in an upright position, improving stepping and maximising opportunities for exploration, interaction and participation.

Product Features

- **Tailored Approach To Every Child**
  With the wide range of adjustments and accessories, the MyWay+ can be tailored to benefit nearly all children (age 1-16) who need additional trunk support. The robust new multi-functional castors, with indoor/outdoor performance will open up a world of possibilities.
- **Unique Corset Like Harness**
  The perfectly engineered, corset like harness provides 360° wraparound support to the trunk. This sensory feedback supports low tone, dampens high tone and ultimately improves stepping pattern. Hoisting loops make transferring in and out a breeze.
- **Open Frame Design**
  Promoting freedom and independence are at the heart of MyWay+. It's what it's designed for. The open-frame design ensures easy, peer-to-peer interaction and increases participation.

LECKEY MyWay Pedal

MyWay Pedal is a revolutionary elliptical trainer which helps improve strength and functional ability. Attaching to the size 2 and 3 MyWay frame, MyWay Pedal is ideal for giving on-the-go kids the opportunity to be active, have fun and join in with their friends.

Product Features

- Targets and strengthens anti-gravity muscles to help reduce the risk of hip and knee contractures developing and improve function. Pedalling in an upright extended position targets and strengthens anti-gravity muscles (calf, quads and hamstring)- unlike a trike which encourages a flexed position, the upright position of MyWay Pedal ensures the quads are worked exactly where strength is often lacking, at the end of range. Working the end of range will reduce the risk of hip and knee contractures and limit the potential for deterioration in standing and walking ability.
- Facilitates elliptical action more like stepping to help support gait therapy goals. MyWay Pedal provides a sensori-motor experience similar to gait. Unlike the circular motion of cycling, the elliptical pedalling of MyWay Pedal gives an extended stretch of the lower limbs as it involves a longer forwards/backwards movement rather than an up/down movement. It helps improve loading around the hip to aid joint development.

- Use in conjunction with the Leckey Connect App to chart performance and motivate the child. The app provides a valuable way of measuring performance and progress on a child's speed, distance and duration of elliptical pedalling. It is available on Android Smartphone, tablet and the Leckey online portal.
- Attaches to the size 2 and 3 MyWay frame and can be fitted with the user in or out of the frame.
- Two sandal sizes available.
- Height adjustable and removable handlebar.

Upsee

Little Steps to an Unexplored World

A mobility harness designed to allow children with special needs to experience upright movement like anyone else.

Product Features

- Facilitates gradual weight-bearing and gives children with motor impairment the closeness and confidence needed to stand and move with the help of an adult.
- Creates opportunity for social and emotional development as users can interact with peers at eye-level.
- Comprised of three parts - child harness, adult belt and double sandal.
- Durable, machine washable and breathable fabrics.
- Two colour options available for each size - please visit our website for further details.

Available in 4 fabric colours

firefly Scooot

Stylish Wheels for Little Explorers

A 4-in-1 sit and ride which gives children the freedom to explore and have fun in style.

Product Features

- Scooot has four configurations: Scoot, Ride, Pooosh and Crawl. Different configurations for different abilities and different ways to play.
- For added support in Scooot, the Advanced Backrest Cushion helps. It's an optional extra that gives support to the child's trunk. The laterals move up and down to give support where it's needed. Or remove them and just have a comfy cushioned backrest. The Advanced Backrest Cushion is easy to attach, wash, and can be bought separately.
- One size caters for children aged 2-6- the footrest adjusts to suit the child's leg-length as they grow.

Technical Details	
Size	**4-in-1**
Age	2-6
Max. User Weight	22kg (48.5lbs)
Seat Depth	400mm (15.5")
Seat Width	230mm (9")
Hip to end of footplate	520mm-630mm (20.5"-24.5")
Backrest Width	260mm (10.5")
Backrest Height	300mm (12")
Wheel Arch Width	230mm (9")
Pooosh Pole	800mm-890mm

Four Configurations

- **Crawl** allows kids to move and explore on their tummy, helping to strengthen their upper body and tummy muscles as they lift their heads and shoulders.
- **Scoot** lets kids sit upright to move around using their feet. Supported by a lap belt and backrest, the child's trunk and pelvis are encouraged to stabilise, freeing up their hands to lift and handle objects, play with family, and explore their surroundings.
- **Ride** lets kids propel themselves around the floor by moving the wheels with their hands. Having fun in this function can build upper body strength, whilst exploration and participation can improve spatial awareness as well as cognitive, sensory and communication abilities.
- **Pooosh** lets somebody else do the hard work. If the child isn't ready to propel themselves yet (or they're just tired), attach the Pooosh handle. It helps get little ones used to the Scooot. And it means parents and therapists can help them follow the fun at home, school or therapy sessions.

Part of the LECKEY family circle

Playpak

Fun Therapy for Little Learners

A portable, versatile early intervention therapy kit which provides children with the building blocks they need to help develop key skills.

Product Features

- Lightweight and portable.
- More than just practical- Playpak looks great with its colourful, fun, child-friendly design.
- Removable fabric can be washed at 40°C and tumble dried at a low temperature.
- Online Therapy Booklet, featuring expert advice and instructions to help develop physical, cognitive, sensory and communication skills.
- Lightweight bag containing an entire activity centre, including rolls, wedges and supports (designed by clinical experts) that stick together in dozens of different ways to practice the early positions which form the building blocks for later abilities.

Helps develop 5 key skills:

- Back Lying (Supine)
- Tummy Lying (Prone)
- Floor Sitting (Long Sitting)
- Side Lying
- Four Point Kneeling

Splashy

Water Adventures for Little Splashers

A lightweight, portable multipurpose bath seat that can be used for both bathing and other fun water play activities.

Product Features

- Splashy is designed to sit low in the bath to allow the child to benefit from being immersed in the water.
- Great aesthetics via bright colour options and a modern design.
- Splashy adapts to the child's postural support needs, with the option of a 5-point harness or the 3-point pelvic support. There are four detachable bumpers to add extra support wherever it's needed. The harness and foam supports attach easily to the seat base using toggles.
- Warm-touch foam feels soft whether it's wet or dry.
- Splashy's base unit lets you switch easily between 26 recline positions, from upright (106 degrees) to full recline (140 degrees).
- Lightweight, detachable parts make it easy to clean.

Available in 3 colours

WHITMYER® Headrests

The Whitmyer range provides a variety of head positioning solutions for support and/or control of the cervical spine and head, from the most basic of needs, to the most complex. The range offers comprehensive sizing and accessories, allowing for individualised positioning of the user.

Adjust-A-Plush and Plush

Product Features

- Single pad headrests which are easily adjustable and accommodate changes or inconsistencies in body positioning.
- Utilises dual density foam layers on a contoured, curved panel.
- Unique “cupping” shape provides posterior support with a high degree of comfort and safety.
- Basic headrest which is ideal for tilt/ recline and has the ability to add lateral and anterior support. The larger size pads are ideal for users with active movements who may try to hook their heads behind other headrests.
